MIST Order Sets

Providers save on average over 30+ clicks on every patient encounter where MIST Order Sets are used!

Documenting orders & plans for a hyperlipidemia visit took just over 2 minutes while documenting the same with MIST Order Sets took just over 16 seconds...S**aving 1.8 minutes on just one patient**!

Reduce the amount of typing needed with each visit that you use MIST Order Sets!

MIST presents a faster, more efficient way to document in NextGen EHR.

MIST Order Sets is a simplified and modernized way to document the provider portion of the patient visit.

We have condensed the steps needed to create orders and plans into just a few clicks. That's right...just a few clicks.

This fast and efficient workflow is achieved by inserting an order sets panel into your existing SOAP template. The provider interacts with the order set panel without having to leave SOAP.

FULLY CONFIGURABLE
Easily create a set of orders for your most common diagnoses. Add patient and provider plans, labs, diagnostics, medications, referrals, follow-up visits and more into one order set.

EASY TO USE
Once configured, order sets are available immediately. Select and use!

SHARE ORDER SETS
Sharing an order set is EASY. Simple select and copy to any provider.

MANAGE ORDER SETS
EHR Administrators can painlessly manage for an enterprise or practice.

MINIMUM REQUIREMENTS
NextGen Application Version: 5.8.2 | NextGen EHR KBM Version: 8.3.x
